**Description**

**Blast Off Extreme Injection 30mL**

Blast Off Extreme 30mL may increase the force of heart muscle contraction, thereby increasing blood flow and oxygen to the muscles in Race Horses, Greyhounds, Dogs and Camels

**COMPOSITION:**  
200mg/ml Myo-Inositol Trispyrophosphate

**ACTIONS:**  
Blast Off Extreme may increase oxygen uptake by binding to hemoglobin and helping release oxygen.

**DESCRIPTION:** The active ingredient of this one of a kind peptide is introduced into the bloodstream which then directly goes into the red blood cells. Those cells, then pick up increased amounts of oxygen when they pass through the lungs and deliver it to the muscles at an increased rate and better efficiency.

**INDICATIONS:**  
-To improve energy and oxygen supply to muscles  
-Increases maximum oxygen uptake and power output  
-Delay onset of fatigue and promote muscle recovery in performance horses

**FOR:** Horses, Greyhounds, Dogs, Camels

**DOSAGE & ADMINISTRATION:**  
30ml given 4-6hrs prior to anticipated exercise

**PRESERVATION:** 30 mL sterile glass vial.

**STORAGE:** Store below 25 C (Air Conditioning)

For use as a supplemental source of Vitamins & Amino Acids in horses, cattle, sheep, swine, camels, alpacas, and pigeons.
